

# Consolidate and Save.

*Comprehensive Imperial Programs Proven to Save Time and Money*

## Overview

Imperial's Chemical Containment Program provides you more buying power by consolidating suppliers and products which helps drive down costs and promotes environmental sustainability.

## What will Imperial do?

At no cost to you, Imperial will:

- Perform a shop audit at your locations listing what chemicals are being used.
- Analyze data and create customized programs.
- Present finding and recommendations.

## Chemical Containment Program Goals

**Consolidate the number of suppliers.**

**Reduce aerosol products.**

- Make the switch from red products (aerosol) to yellow products (non-aerosol) to green products (certified green). Moving from red products to all green products could cause problems, so we are approaching the conversion in small steps. As more quality green products become available we will add them to the offering.

**Reduce duplicate aerosol products.**

- A shop that carries three different brands of glass cleaner, for example, could benefit in making the decision to support just one brand, saving money in the process.

**Reduce the amount of waste.**

- Fewer half-empty aerosol cans to keep organized around the shop.
- Fewer cans in the landfill.

**Compliance made easy.**

- Easier compliance for MSDS sheets through vendor consolidation.
- Imperial keeps up-to-date on new industry regulations

National Distributor of Quality Maintenance Supplies Since 1958.
